

Nadia Romanchuk

PORTFOLIO: Frontend developer

Lviv, Ukraine | +38 063 32 66 252 | [LinkedIn](#) | [Github](#) | [E-mail](#) | [Telegram](#)

Summary

Frontend Developer with 1+ year of commercial experience. Delivered production websites and web applications in React, JavaScript, and WordPress — translating Figma designs into pixel-perfect, responsive interfaces, optimizing performance, and building reusable UI components. Strong collaborator with designers and backend developers. Currently learning Next.js (App Router, SSR/SSG) and Stripe for SaaS product roles, and open to growing into a full-stack developer.

Professional Experience

Frontend Developer

VALKO.PRO | Hybrid, Ukraine

Jun 2025 – Present

Delivered commercial websites end-to-end — from Figma designs to production deployment — using React, JavaScript, SCSS, and WordPress. Optimized performance (image formats, lazy loading, Gulp bundling), improving bounce rate and page load time, as tracked in Google Analytics. Created reusable UI components (sliders, modals, animated sections) that sped up development of subsequent projects. Ensured pixel-perfect, responsive, and cross-browser layouts.

Frontend Developer

NDA | IT Product Company | Office

Jul 2024 – Feb 2025

Built reusable UI components used across multiple product pages, reducing duplicated code and speeding up feature delivery. Debugged UI/performance issues with Chrome DevTools — fixed layout shifts, re-renders, and cross-browser bugs on production. Collaborated daily with designers and backend devs on UX details and API contracts; integrated REST endpoints with proper loading/error states. Refactored legacy jQuery into modular ES6+ JavaScript.

Skills

- Frontend: React, Redux, Redux Toolkit, Zustand
- Languages: JavaScript, TypeScript
- Web Technologies: HTML/CSS, SCSS, Tailwind CSS
- Libraries: React Router, TanStack Query
- Testing: Currently studying unit testing fundamentals (Jest / React Testing Library)
- Tools/CMS: Git, GitHub, Gulp, npm, Chrome DevTools, WordPress
- Environment: WebStorm, VS Code, Cursor AI, Gemini, Claude Code
- APIs/DB: REST API, Axios, MySQL, MongoDB
- Languages: English — B1 (Intermediate), actively improving

PROJECT

BookTrack | *Personal Project*

Dec 2025 – Jan 2026

Book-tracking SPA with Firebase Authentication (email + Google) — directly applicable to SaaS auth flows. Built debounced search, favorites, and progress tracking via custom hooks and Context API.

Tech stack: React (hooks, Context API, custom hooks), React Router, Firebase Authentication, Formik, Tailwind CSS

Dental Clinic Website | *Commercial Project*

Apr 2025 – Jul 2025

Conversion-oriented marketing site built from scratch (Figma → SCSS/JS (Gulp pipeline) → WordPress → production). Implemented interactive UI (slider, modals, scroll animations) which improved engagement metrics in GA. Optimized assets and Core Web Vitals via Gulp pipeline.

Tech stack: HTML, SCSS, JavaScript, Gulp, Git, WordPress

EDUCATION, COURSES

Course React, Hillel IT School

JavaScript Fundamentals, SoftServe Academy

Active member, Codewars

National Pedagogical Dragomanov University, Kyiv

Specialty: teacher of mathematics, economics, and computer science
